The problem in the chat app is my computer is too slow. It cannot run 2 emulators at the same time. So I use real device and one emulator to debug.

There are some confusions in the assignment :
- Add book or search
- No detail activity but there is search activity
- There is delete icon on option menu but the instruction tell that delete by context menu
- "You need to add option menus for the Search and Checkout activities" There is no search menu icon in the boiler plate, instead, there is add menu icon

Here are some additional research :
- To show action bar in Activity that extends ListActivity, add them in <application> or <activity>

`android:theme="@android:style/Theme.Holo.Light.DarkActionBar"`

- Add adapter with view list
    - https://github.com/codepath/android_guides/wiki/Using-an-ArrayAdapter-with-ListView
- Read & writing arrays of Parcelable objects
    - http://stackoverflow.com/questions/10071502/read-writing-arrays-of-parcelable-objects
- Long press
    - http://stackoverflow.com/questions/6141882/how-to-capture-long-press-event-for-listeview-item-of-a-listactivity
